Taiyo Circuit Automation Welcomes Marwen Chakroun to Drive Growth in France and EMEA Through Enhanced Technical Support

Carson City, Nevada, USA — 18th September — Taiyo Circuit Automation (TCA) a leading provider of PCB advanced coating, drying and automation solutions, and a division of Taiyo America Inc, is pleased to announce the appointment of Marwen Chakroun to its European team. In his new role, Marwen will spearhead business development and elevate customer support operations throughout France and the wider EMEA markets.

With extensive experience in industrial maintenance, field service engineering, technical support, and customer relationship management, Marwen has a deep, first-hand understanding of how to improve machine performance, reliability, and production efficiency.

Taiyo Circuit Automation is confident that Marwen's proven track record in installing, proactively maintaining, troubleshooting, and enhancing the reliability of complex industrial machinery will be a major asset to TCA's partners. Through Marwen's commitment to TCA's mission of providing industry-leading technical support to its partners, TCA will drive regional expansion by reinforcing its position as the premier trusted partner for PCB coating, drying, and automated manufacturing solutions.

"I am incredibly proud to join Taiyo Circuit Automation and represent a brand with such an outstanding reputation in the PCB industry," said Marwen Chakroun. "Having worked alongside manufacturers for many years, I know that market leadership requires more than high-performance equipment; it demands exceptional responsiveness, deep technical expertise, and a commitment to long-term partnerships. My primary objective is to stay close to our current customers and forge new relationships as we grow, anticipate their unique production needs, and deliver the highest standard of technical and commercial support. I look forward to connecting with our current and future partners across the EMEA region."

To learn more about Taiyo Circuit Automation's products, proactive support practices, and unmatched partner services, please visit TaiyoCircuitAutomation.com. Contact Info@TaiyoCircuitAutomation.com to get connected with Marwen Chakroun or your local representative.

About Taiyo Circuit Automation:

Taiyo Circuit Automation (TCA), a division of Taiyo America Inc, TCA is a leading provider of advanced coating, drying and automation solutions for the printed circuit board (PCB) industry. TCA's long history of providing manufacturing solutions (previously under the Circuit Automation brand) combined with Taiyo America's PCB ink expertise makes TCA the unmatched experts in this sector. TCA's portfolio includes double-sided coating solutions such as the DP1500 PRO and DP3500 Smart Print System, fully automated DP6000 and DP9000 systems, as well as various oven and drying solutions to meet your manufacturing needs.
